Course Description

This hands-on course will explore the fundamentals of Laser Science. This program will discuss the value and benefit of Laser as an essential element in periodontal therapy and for optimum recall management in patient health and wellness. Learn the specifics of laser fiber optic delivery and discover the delicate nature of using a laser device. Working with simulation exercises, this workshop is designed to build confidence and gain clinical understanding in the delivery of periodontal treatment protocols in Hygiene. Code: 497

Instructor

Jill Grassmick, RDH, is a graduate of State University of New York at Buffalo with a degree in Dental Hygiene. She has 40+ years of clinical practice experience with emphasis on general, cosmetic and periodontal care with 17 years clinical experience in soft tissue lasers. She holds the Academy of Laser Dentistry Standard Proficiency in both Diode and Nd: YAG lasers. Her career has been multifaceted in clinical dental hygiene, dental hygiene consulting services, entrepreneur and CE speaker. Jill is an active leader in the American Dental Hygienists' Association (ADHA) serving at the local, state and national levels. Also, a member of the Academy of Laser Dentistry and the Association of Implant Auxiliaries.

- Learn the benefits of using a diode laser in conjunction with conventional SRP in the reduction of bacteria in periodontal pockets.
- Possess an understanding of laser physics and tissue interaction
- Elevate knowledge of science and evidence behind laser use in dental hygiene therapy
- Understand the proper settings and safety of laser use
- Understand the integration of the laser into the dental hygiene appointment
